218

THE

AMERICAN JOURNAL OF SCIENCE.

EDITOR: EDWARD S. DANA.

ASSOCIATE EDITORS

PROFESSORS GEO. L. GOODALE, JOHN TROWBRIDGE, H. P. BOWDITCH AND W. G. FARLOW, OF CAMBRIDGE,

PROFESSORS O. C. MARSH, A. E. VERRILL AND H. S. WILLIAMS, OF NEW HAVEN,

PROFESSOR GEORGE F. BARKER, OF PHILADELPHIA,
PROFESSOR H. A. ROWLAND, OF BALTIMORE,
MR. J. S. DILLER, OF WASHINGTON.

FOURTH SERIES.

VOL. IV—[WHOLE NUMBER CLIV.]

WITH XII PLATES.

PUBLIC LIBRARY,
DETROIT, MICH.
MAY 19 1898

NEW HAVEN, CONNECTICUT.
1897.

THE TUTTLE, MOREHOUSE & TAYLOR PRESS,

NEW HAVEN, CONN.

CONTENTS TO VOLUME IV.

Number 19.

Page

ART. I.—Pressure Coefficient of Mercury Resistance; by A. DEF. PALMER, Jr. 1

II.—Ctenacanthus Spines from the Keokuk Limestone of Iowa; by C. R. EASTMAN 10

III.—Studies in the Cyperaceæ, V.; by T. HOLM 13

IV.—Identity of Chalcostibite (Wolfsbergite) and Guejarite, and on Chalcostibite from Huanchaca, Bolivia; by S. L. PENFIELD and A. FRENZEL 27

V.—Interesting Case of Contact Metamorphism; by H. W. FAIRBANKS 36

VI.—Tin Deposits at Temescal, Southern California; by H. W. FAIRBANKS 39

VII.—Outlying Areas of the Comanche Series in Oklahoma and Kansas; by T. W. VAUGHAN 43

VIII.—Electrosynthesis; by W. G. MIXTER 51

IX.—Monazite from Idaho; by W. LINDGREN 63

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Viscosity of Mixtures of Miscible Liquids, THORPE and RODGER: Specific Heats of the Gaseous Elements, BERTHELOT, 65.—Synthetic Action of the Dark Electric Discharge, LOSANITSCH and JOVITSCHITSCH: Structural Isomerism in Inorganic Compounds, SABANÉEFF, 66.—Phase Rule, W. D. BANCROFT, 67.—Vorlesungen über Bildung und Spaltung von Doppelsalzen, 68.—Limits of Audition, LORD RAYLEIGH, 69.—Polarization Capacity, C. M. GORDON: Oscillatory Currents arising in Charging a Condenser, SEILER: Cathode Rays, 71.—Application of the Röntgen Rays to Surgery: Transparency of Ebonite, M. PERRIGOT: Theory of Electricity and Magnetism, A. G. WEBSTER, 72.—Light and Sound, E. L. NICHOLS and W. S. FRANKLIN, 73.

Geology and Mineralogy—Examination of Deposits obtained from borings in the Nile Delta, J. W. JUDD, 74.—Underground Temperatures at Great Depths, W. HALLOCK: Depth of Peat in the Dismal Swamp, G. R. WIELAND: Currituck Sound, Virginia and North Carolina, G. R. WIELAND, 76.—Papers on Dæmonelix: Genesis and Matrix of the Diamond, LEWIS and BONNEY, 77.—Transactions of the Geological Society of South Africa: Geological Survey of Canada, G. C. HOFFMANN, 78.

Botany—New System of Classification of Phænogamia, VAN TIEGHEM, 79.

Miscellaneous Scientific Intelligence—Cause of Secondary Undulations Registered on Tide Gauges, 82.—Zoölogical Bulletin, 83.

Obituary—ALVAN GRAHAM CLARK, 83.—CARL REMIGIUS FRESENIUS, 84.

Number 20.

Page

ART. X.—Tamiobatis vetustus; a new Form of Fossil Skate; by C. R. EASTMAN. (With Plate I.) 85

XI.—Florencia Formation; by O. H. HERSHEY 90

XII.—Native Iron in the Coal Measures of Missouri; by E. T. ALLEN 99

XIII.—Bixbyite, a new Mineral, and Notes on the Associated Topaz; by S. L. PENFIELD and H. W. FOOTE 105

XIV.—Composition of Ilmenite; by S. L. PENFIELD and H. W. FOOTE 108

XV.—Separation of Aluminum and Beryllium by the action of Hydrochloric Acid; by F. S. HAVENS 111

XVI.—Igneous Rocks of the Leucite Hills and Pilot Butte, Wyoming; by W. CROSS 115

XVII.—Stylolites; by T. C. HOPKINS 142

XVIII.—Extinct Felidæ; by G. I. ADAMS 145

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Electrical Convection of certain Dissolved Substances, PICTON and LINDER, 150.—Phenomena of Supersaturation and Supercooling, OSTWALD: Thermochemical Method for determining the Equivalents of Acids and Bases, BERTHELOT, 151.—Action of Potassium and Sodium vapor in coloring the Haloid salts of these metals, GIESEL: Action of the Silent Electric Discharge on Helium, BERTHELOT, 152.—Further Note on the Influence of a Magnetic Field on Radiation Frequency, LODGE and DAVIES, 153.

Geology and Mineralogy—Recent publications of the U. S. Geological Survey, 155.—Pleistocene Features and Deposits of the Chicago Area, F. LEVERETT, 157.—A new fossil Pseudoscorpion, H. B. GEINITZ: Catalogus Mammalium tam viventium quam fossilium, E.-L. TROUESSART: Brief Notices of some recently described Minerals, 158.—The Bendegó Meteorite, O. A. DERBY, 159.

Miscellaneous Scientific Intelligence—American Association for the Advancement of Science, 160.—Development of the Frog's Egg, an Introduction to Experimental Embryology, T. H. MORGAN, 161.

Obituary—ALFRED M. MAYER, 161.—A. DES CLOIZEAUX: JULIUS SACHS, 164.

Number 21.

Page

ART. XIX.—Principal Characters of the Protoceratidæ; by O. C. MARSH. Part I. (With Plates II–VII.) 165

XX.—Theory of Singing Flames; by H. V. GILL 177

XXI.—Electrical Discharges in Air; by J. TROWBRIDGE ... 190

XXII.—Oscillatory discharge of a large Accumulator; by J. TROWBRIDGE 194

XXIII.—Jura and Neocomian of Arkansas, Kansas, Oklahoma, New Mexico and Texas; by J. MARCOU 197

XXIV.—Pithecanthropus erectus; by L. MANOUVRIER. Translated by George Grant MacCurdy 213

XXV.—Titration of Sodium Thiosulphate with Iodic Acid; by C. F. WALKER 235

XXVI.—Solarization effects in Röntgen Ray Photographs; by W. L. ROBB. (With Plates VIII–X.) 243

XXVII.—Cape Fairweather Beds, a new marine Tertiary Horizon in Southern Patagonia; by J. B. HATCHER ... 246

SCIENTIFIC INTELLIGENCE.

Natural History—New Series of Contributions from the Gray Herbarium of Harvard University. No. XI. J. M. GREENMAN: Synoptical Flora of North America, Vol. 1. Part I, 249.—Illustrated Flora of the Northern United States, Canada, and the British Possessions, N. L. BRITTON and A. BROWN: Guide to the Genera and Classification of the North American Orthoptera found north of Mexico, S. H. SCUDDER: Das Tierreich, E. HARTERT, 250.

Miscellaneous Scientific Intelligence—American Association for the Advancement of Science, 250.—Transactions of the American Microscopical Society, 256.

Number 22.

Page

ART. XXVIII.—Fractional Crystallization of Rocks; by G. F. BECKER 257

XXIX.—Eopaleozoic Hot Springs and the Origin of the Pennsylvania Siliceous Oölite; by G. R. WIELAND 262

XXX.—Conditions required for attaining Maximum Accuracy in the Determination of Specific Heat by the Method of Mixtures; by F. L. O. WADSWORTH 265

XXXI.—Systematic position of Crangopsis vermiformis (Meek), from the Subcarboniferous rocks of Kentucky; by A. E. ORTMANN 283

XXXII.—New Species of the Palinurid-Genus Linuparus found in the Upper Cretaceous of Dakota; by A. E. ORTMANN 290

XXXIII.—Studies in the Cyperaceæ, VI.; by T. HOLM 298

XXXIV.—Improved Heliostat invented by Alfred M. Mayer; by A. G. MAYER 306

XXXV.—Pseudomorphs from Northern New York; by C. H. SMITH, JR. 309

XXXVI.—Chemical Composition of Hamlinite and its Occurrence with Bertrandite at Oxford County, Maine; by S. L. PENFIELD 313

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Properties of Highly Purified Substances, SHENSTONE, 317.—Liquefaction of Fluorine, MOISSAN and DEWAR, 318.—Normal and Isopentane from American Petroleum. YOUNG and THOMAS: Heat of Combustion, MENDELÉEFF, 319.—Capillary constants of molten metals, H. SIEDENTOPF, 320.—Relations between the Geometric constants of a crystal and the Molecular Weight of its Substance, G. LINCK, 321.—Induction Coil in practical work, including Röntgen Rays, L. WRIGHT.

Miscellaneous Scientific Intelligence—British Association, 324.—Notes on Greenland glaciation, R. S. TARR: Revision of the Apodidæ, C. SCHUCHERT: New Meteorite from Canada, 325.—Observations on Popocatepetl and Ixtaccihuatl, O. C. FARRINGTON: L. Évolution régressive en Biologie et en Sociologie, J. DEMOOR, J. MASSART and E. VANDERNELDE: Birds of Colorado, W. W. COOKE: Mammoth Cave of Kentucky: an illustrated Manual, H. C. HOVEY and R. E. CALL, 326.

Number 23.

Page

ART. XXXVII.—Geology of Southern Patagonia: by J. B. HATCHER 327

XXXVIII.—Some of the large Oysters of Patagonia; by A. E. ORTMANN. (With Plate XI.) 355

XXXIX.—Former Extension of the Appalachians across Mississippi, Louisiana, and Texas; by J. C. BRANNER .. 357

XL.—Combustion of Organic Substances in the Wet Way; by I. K. PHELPS 372

XLI.—Some Features of Pre-Glacial Drainage in Michigan; by E. H. MUDGE 383

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Verification of Dalton's law for Solutions, WILDERMANN, 387.—Spectrum of Silicon, A. DE GRAMONT: Spark Spectrum of Cyanogen, HARTLEY, 388.—Electrolytic Solution and Deposition of Carbon, COEHN. 389.—Conversion of Nitrites into Cyanides, KERP: Physics, Student's Manual for the Study Room and Laboratory, COOLEY: Action at a distance, P. DRUDE, 390.—Electrical tension at the poles of an induction apparatus, A. OBERBECK: Investigation of the Lenard Rays, TH. DES COUDRES: Behavior of rarified gases in approximately closed metallic receptacles in a high frequency field, H. EBERT and E. WIEDEMANN: Cathode Rays, J. J. THOMSON, 391.—Effect of Pressure on Wave Length, W. J. HUMPHREYS, 392.

Geology and Natural History—Recent publications of the U. S. Geological Survey, 392.—Alabama, Geological Survey, 393 —Canada, Geological Survey: Indiana, 21st Annual Report of Department of Geology and Natural Resources, 1896: Fossil Insects of the Cordaites shales of St. John, N. B., G. A. MATTHEW, 394.—Cape of Good Hope, 1st Annual Report of the Geological Commission, 1896: Glacial observations in the Umanak district, Greenland, G. H. BARTON: Les Variations de longueur des Glaciers dans les Régions arctiques et boréales, C. RABOT, 395.—Esquisses Sélénogiques, W. PRINZ, 396.—Experimental Morphology, C. B. DAVENPORT, 397.

Miscellaneous Scientific Intelligence—Geological Lectures of Harvard University, HANS REUSCH, 397.—Calculus for Engineers, J. PERRY: Ostwald's Klassiker der Exakten Wissenschaften, 398.

Obituary—VICTOR MEYER, 398.

Number 24.

Page

ART. XLII.—A Microsclerometer, for determining the Hardness of Minerals; by T. A. JAGGAR, JR. (With Plate XII.) 399

XLIII.—Recent Observations on European Dinosaurs; by O. C. MARSH 413

XLIV.—Sapphires from Montana, with special reference to those from Yogo Gulch in Fergus County; by G. F. KUNZ 417

XLV.—Corundum-bearing Rock from Yogo Gulch, Montana; by L. V. PIRSSON 421

XLVI.—Crystallography of the Montana Sapphires; by J. H. PRATT 424

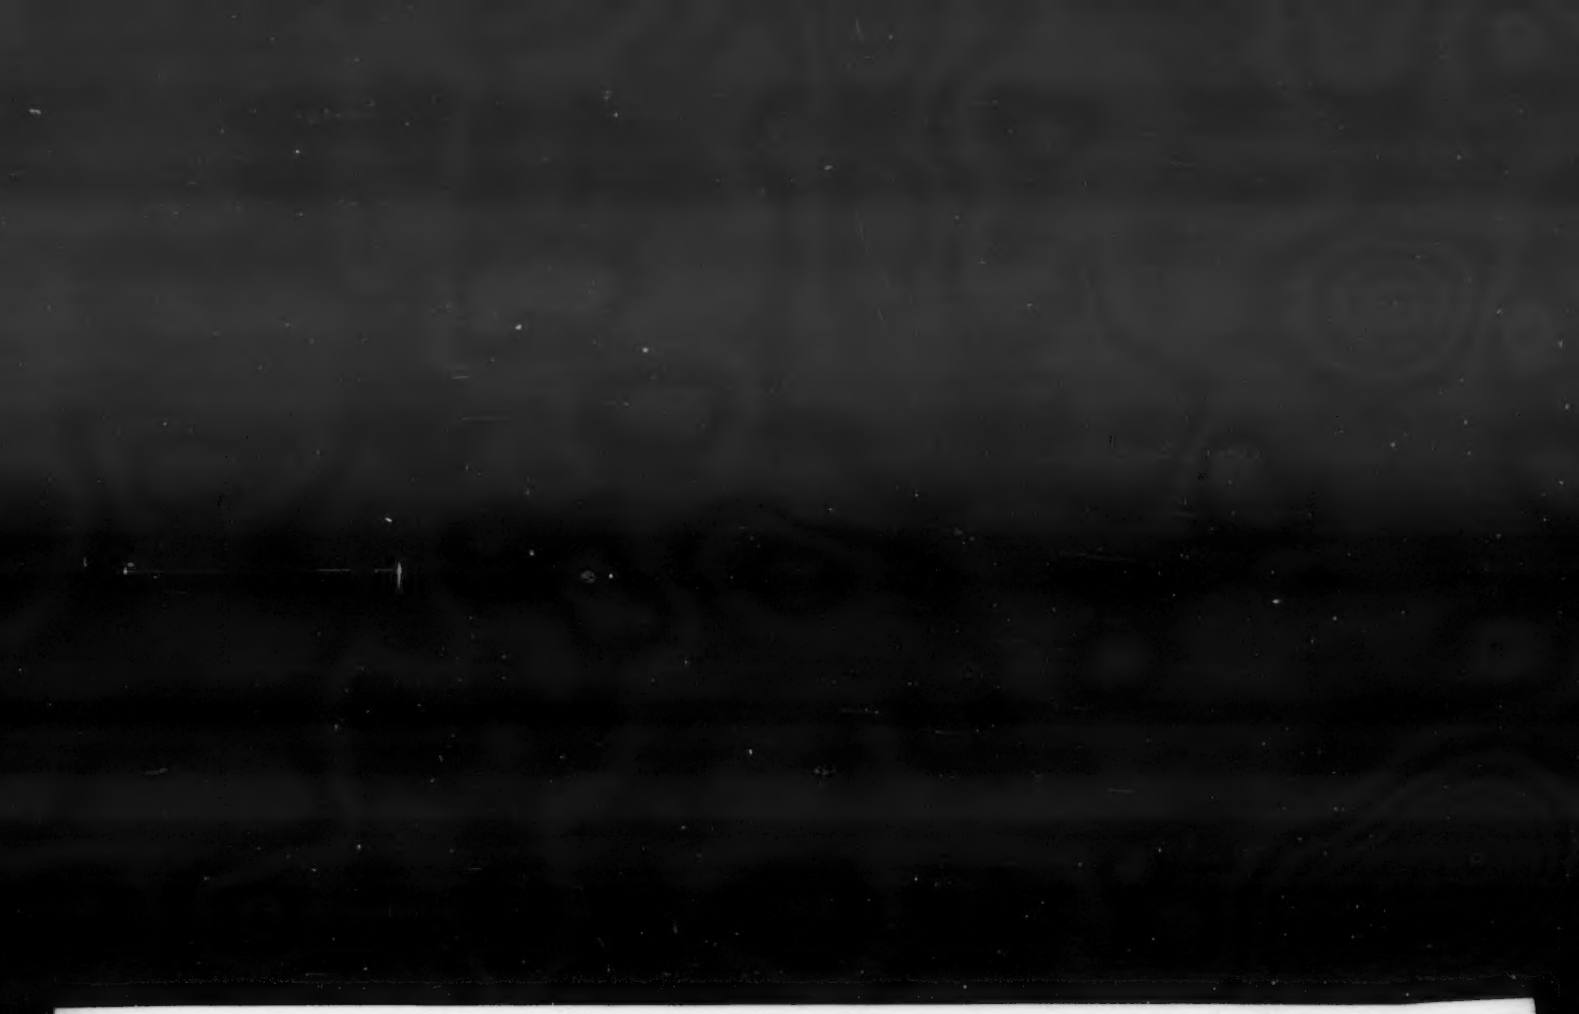
XLVII.—Electrical Measurement by Alternating Currents; by H. A. ROWLAND 429

XLVIII.—The alleged Jurassic of Texas. A Reply to Professor Jules Marcou; by R. T. HILL 449

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Thermal Phenomena attending Change in Rotatory Power, BROWN and PICKERING, 470.—Chemical Action of Electrical Oscillations, DE HEMPTINNE, 471.—Explosion of Chlorine Peroxide with Carbon Monoxide, DIXON, 472.—Absorption of Nitrogen by Carbon compounds under the influence of the silent Electric Discharge, BERTHELOT: Manual of Qualitative Analysis, C. R. FRESENIUS, 473.—Delay in spark discharges, E. WARBURG: Photoelectric relations of Fluorspar and of Selenium, G. C. SCHMIDT, 474.—Magnetic method of showing metallic iron: Spectra of certain stars, VOGEL and WILSING: Structure of the Cathode Light and the nature of the Lenard Rays, GOLDSTEIN: New Nicol Prism, 475.

Geology and Natural History—Observations on Baffinland, R. BELL, 476.—International Geological Congress, 477.—Mineral Resources of the United States, 1895, D. T. DAY: Descriptive Catalogue of Useful Fiber Plants of the World, including the structural and economic classifications of fibers, C. R. DODGE, 478.

Miscellaneous Scientific Intelligence—Natural Academy of Sciences, 479.—Cordoba Photographs, B. A. GOULD: November Meteors: Sixteenth Annual Report of the Bureau of American Ethnology, J. W. POWELL, 480.—Field Columbian Museum: American Journal of Physiology, 481.


INDEX, 482.
